kali@kali: ~/lab-work

kali@kali:~\$

sudo tshark -r capture.pcap -q -z conv,tcp

=====

TCP Conversations

=====

Client	Server	Packets	Bytes	Flags
-----	-----	-----	-----	-----
192.168.1.120:51234	45.33.128.210:443	156	234K	SYN
192.168.1.120:51240	192.168.1.110:80	42	85K	SYN
192.168.1.105:49152	142.250.74.110:443	89	124K	SYN
192.168.1.105:49200	140.82.121.4:443	34	42K	SYN

Suspicious Pattern - 192.168.1.120 <-> 45.33.128.210:443:

- Regular beaconing interval: ~60 seconds
- Small data packets to C2 (640-1420 bytes = beacons)
- Larger data from C2 (512-2840 bytes = responses)
- Total data: ~234KB over 10 minutes
- Pattern consistent with Cobalt Strike C2 traffic

kali@kali:~\$

sudo tshark -r capture.pcap -Y 'ip.addr == 45.33.128.210' -q -z io,stat,60

=====

I/O Statistics (60 second intervals)

=====

Interval	Frames	Bytes	Avg Bytes/Frame	Notes
-----	-----	-----	-----	-----
0-60s	34	45,280	1,332	Initial C2 contact
60-120s	12	8,960	747	Beacon heartbeat
120-180s	18	15,340	852	Data exfiltration

Anomaly: Regular 60-second beacon interval = RAT/C2 behavior
