

[Configuring Splunk forwarder to collect system logs...]

kali@kali:~\$

```
sudo /opt/splunk/bin/splunk add monitor /var/log/auth.log -index security -sourcetype linux_auth
Added monitor of '/var/log/auth.log'
```

kali@kali:~\$

```
sudo /opt/splunk/bin/splunk add monitor /var/log/syslog -index system -sourcetype linux_syslog
Added monitor of '/var/log/syslog'
```

kali@kali:~\$

```
sudo /opt/splunk/bin/splunk add monitor /var/log/ufw.log -index security -sourcetype linux_ufw
Added monitor of '/var/log/ufw.log'
```

kali@kali:~\$

```
sudo /opt/splunk/bin/splunk status
splunkd is running (pid: 12345).
splunk web is running (pid: 12356).
```
