INCIDENT RECORD #IR-2025-0828
=====
```

Date Detected: 2025-08-28 10:22 IST
Reported By: Suricata IDS (automated alert)
Incident Type: Unauthorized Access / Brute Force Attack
Affected Systems: 192.168.1.120 (Workstation-07)
Source of Attack: 45.33.128.210 (External)

Description:

An external IP (45.33.128.210) performed a brute force attack against the SSH service on 192.168.1.120, succeeding after 5 attempts. The attacker created a backdoor user 'hacker' (UID 0), installed a crontab-based persistence mechanism, and established C2 communication with 10.0.0.50:443.

SEVERITY ASSESSMENT:

- Confidentiality Impact: HIGH
 - > Attacker gained root access to workstation
- Integrity Impact: HIGH
 - > Backdoor user account created
 - > System binaries potentially modified
- Availability Impact: LOW
 - > System remained operational

PRIORITY CLASSIFICATION: P1 - CRITICAL

=====

RESPONSE ACTIONS REQUIRED

=====

Immediate (0-4 hours):

- [x] Isolate 192.168.1.120 from network
- [x] Block 45.33.128.210 at perimeter firewall
- [x] Block 10.0.0.50 at perimeter firewall

Short-term (24-48 hours):

- [] Forensic imaging of 192.168.1.120
- [] Password reset for all root accounts
- [] Enable fail2ban on all SSH servers

Long-term (1-2 weeks):

- [] Implement SSH key-only authentication
- [] Network segmentation review
- [] Employee security awareness training
